## Authorization for Remote Patient Monitoring Service

Your health and wellness are our priority at Advanced Respiratory & Sleep Medicine Clinic. As part of our connected care program, we invite you to participate in our remote vitals monitoring program, where routine review of your health in real-time occurs. Different health parameters like blood pressure, weight, peak airflow or SpO2 may be measured based on health plan goals.

Medicare covers the cost of the program (copay may apply if you do not have secondary insurance coverage), and active participation in the program is as simple as taking one routine reading per day.

This allows our team to monitor unwanted variances and advice on health management remotely. Ultimately, decisions are made during physician and patient discussions.

---

I, as the patient, understand and provide consent to Advanced Respiratory & Sleep Medicine and its affiliates, to receive a device and participate in remote monitoring of a medical/health parameter. At any given time, I may revoke this consent and discontinue use of this device by giving a verbal/written notice to the physician or staff. This authorization is effective for 1 year and may auto-renew annually from the below date.
